

3. Robotkrig / Robowars

Robowars is the biggest event of the semester for Omega Verksted. Here teams and single participants create robots to compete against each other.

Rules

See the [rules section](#)

The Competition

The competition consists of two parts. The first part is an obstacle course where the robots will have to navigate around the cage and destroy aluminium cans for points. The second part is a standard single elimination tournament where two and two robots face off against each other until one is left standing. Additionally, independent judges will make an assessment of the robots which will contribute points.
